APPLICATIONS

METAL CUTTING BLADES

PREMIUM CARBIDE TIPPED CUTTING **STEEL**

Steel Plate ▼ Pipe ▼ Structural Steel
Threaded Rod ▼ Grating ▼ Unistrut ▼ Solid Bar

CERMET TIPPED CUTTING **STAINLESS STEEL**

Angle Iron ▼ Stainless Pipe
Rounds ▼ Stainless Plate ▼ Stainless Unistrut

PREMIUM CARBIDE TIPPED CUTTING **ALUMINUM**

Expanded Metal ▼ Aluminum Solids
Tubing ▼ Plate ▼ Extrusions
Aluminum structurals

FEATURES & BENEFITS

CORDLESS METAL CUTTING BLADES

OPTIMIZED for CORDLESS SAWS

ADVANTAGE:

Delivers *more cuts per charge*

BENEFIT:

Time and cost savings

THIN KERF BLADE

ADVANTAGE:

Less vibration during the cut, Faster cutting

BENEFIT:

*Longer time between battery charges,
smoother cut, less burr*

FAST CUTTING

ADVANTAGE:

Quick, accurate cuts in a variety of metal shapes

BENEFIT:

More pieces cut-per-day lowers cost

TIP GEOMETRY

ADVANTAGE:

CL blade design minimizes stress in the carbides

BENEFIT:

Longer Blade Life, low noise

UNIQUE GULLET DESIGN

ADVANTAGE:

Clears chips more efficiently

BENEFIT:

*Consistent & longer life
Hassle free operation*

TIPS FOR LONGER LIFE

- ▼ **NEVER** run the saw unit if the battery is fully drained.
- ▼ **ALWAYS** hold the work piece steady.
- ▼ **DO NOT** be too slow or too aggressive in cutting.
- ▼ Overheated blade or machine will **NEVER** help prolong the blade life.
- ▼ Start the saw and let it run at **FULL SPEED** before touching the work piece.
- ▼ Empty the chip collector whenever possible.
